6) Cryptarithmetic Puzzle :

```
from itertools import permutations

digits = range(10)

for T, W, O, F, U, R in permutations(digits, 6):
    if T == 0 or F == 0:
        continue

    TWO = 100 * T + 10 * W + O
    FOUR = 1000 * F + 100 * O + 10 * U + R

    if TWO + TWO == FOUR:
        print("T =", T)
        print("W =", W)
        print("O =", O)
        print("F =", F)
        print("U =", U)
        print("R =", R)
        print(TWO, "+", TWO, "=", FOUR)
        break
```
